Conclusions from the analysis:

1) In the extracted data, the OnePlus brand has the most number of mobiles in bestseller list amazon.
2) The average ratings for various brands are close to 4. One plus has the highest average rating.
3) The average price for different brands vary greatly. OnePlus has the highest mean price as well as Nokia has the lowest mean price.
4) When we review the correlation matrix as well as the regression plot, we can see that the rating is directly proportional to the price of the mobile.
5) According to the created wordcloud, it seems that customers look for the features like 'good performance', 'good looks', and 'fast charging'.
